Thursdays: 3/7, 3/13, 3/21, 3/28, 4/4, 4/11, 4/18, 4/24

This interactive class will teach students the science behind the “circle of life” around the world and how the webs of various animal kingdoms affect one another and can have far reaching connections. This class will explore such topics like the purpose of ancient routes of Sea Turtles, Monarch Butterfly’s and Migratory Birds and the impact of these routes on other fauna and flora. Students will also learn the impact humans have on this “circle of life.” Join us for this popular class as students love learning from instructor Sheryl Brook!
