

ABOVE AND BEYOND COMMUNITY CLASSES, INC. PRESENTS:
HISTORY OF GAMES, HOBBIES, AND COLLECTIBLES
Learn, Explore, and Share with Erin Vlasak

Tuesdays 2-2:50pm via Zoom or In-Person

This interactive class will teach the historical roots of games, hobbies and collectibles and show how, when people find things they are passionate about, it can help them survive and even thrive. Many people tend to have specific items that they collect for either value or tradition, like comics or works of art. This class will present some of the rare and maybe "odd" collectibles of well-known people throughout history- from Legos to lawn games to tabletop and classic board games. This class also offers you the chance to learn about games from other cultures, discuss the latest apps, present your interests or collectibles to others, and end class with a better understanding of the personal and historical functional role of Games, Hobbies and Collectibles. Erin Vlasak has been teaching for decades and each bring a passion for uncommon collectibles and "old school" games and hobbies.
